*If you have a problem with sand that needs to be cleaned in an area that is not accessible to power equipment then JOBE has the tools to solve your problem.*

## THE SAND WITCH *FLIES THROUGH SAND*

These rugged steel sand scoops are designed to skim the surface picking up targets for detectorist or debris from the surface of the sand with minimal penetration. For beach or playground maintenance they are perfect for removing trash, broken glass, cigarette butts, oil-soaked sand, or tar while allowing clean sand to pass through. The Sand Witch is designed with a wide flat cutting surface to maximize surface coverage and minimize digging. They are available with a 10 inch handle or a 28 inch handle with a comfortable foam grip. The opening is 5 1/4 inches wide and 3 1/2 inches tall, weighs only 28 ounces with the 10 inch handle. These are normally zinc plated steel but are available in stainless steel or aluminum. They can also be powder coated red, blue, or safety orange by special request.

- #-5560 Zinc plated with a 10 inch handle. m.s.r.p. **\$44.95**
- #-5561 Zinc plated with a 28 inch handle. m.s.r.p. **\$49.95**

JOBE also manufactures a variety of rugged steel sand baskets in the traditional round configuration.

**The Treasure Scoop:** This reinforced plastic scoop was originally designed for metal detecting. It had to be to be strong enough to dig in any kind of soil and to be nonconductive to identify metal targets that were in the scoop. These properties of being strong, nonconductive, with a large scoop section make this a very versatile tool for many purposes. These scoops are extremely strong and are designed to dig or to transfer any kind of high viscosity liquid or dry material. They are very effective in environmental clean up activities for hazardous material or oil spills in areas that are not accessible to power equipment, or any other activity where you need a hand scoop that is very strong and impervious to chemicals. The tool is over 12 inches long from tip to tip and the scoop part is almost 4 inches wide. We have them in black, blue, green and yellow.

# The Dune Doctor

The **Dune Doctor** is a serious beach maintenance tool when utilized to remove oily solids or trash from the surface of sand or water with minimal time, fatigue, and loss of clean sand.. The basket opening is 12 inches wide and 4 inches high, yet the entire weight of the tool is only 4 pounds including a 42 inch fiberglass handle. The Dune Doctor can be configured in either a rake or shove mode in seconds by moving one bolt. Either way, it efficiently skims debris off the surface, capturing it in the steel basket. A quick shake allows the clean sand to pass through the 1/2 inch square holes, and then a quick turn of the wrist drops the debris out into an appropriate receptacle. Patent is pending.

**As a Shovel**
